Response to Amendment

This action is responsive to Applicants response filed January 13, 2005 in which claims 1-8 remain pending. The address change submitted 2/27/04 has been noted.

Priority

Claims Priority from Provisional Application 60/268,140 filed on February 12, 2001.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsumoto et al (U.S. Patent No. 6,763,334).

Regarding claims 1 and 7, Matsumoto discloses a system and method for determining which ads direct which web clicks comprising (abstract):

a database comprising information about a user's media buys (fig. 1, item 15, col. 7, lines 15-56).

an index log file optionally comprising a user's IP address (fig. 2, item 62, col. 8, lines 53-64);

Application/Control Number: 10/074,401

Art Unit: 2161

said system comparing information from said first database with information from said index log file to determine which of said ads generated said web clicks (col. 10, lines 8-12).

Matsumoto does not expressly teach a second database for storing user's IP address, but does store user's referrer log showing all referring pages from which the user is led to entrance page and also optionally stores the user's IP address in the index log file (62). Note, the user's IP address does not have to be stored because Matsumoto system uses an index URL embedded in the ad which allows for the monitoring of the user's access induced by the advertisement hence the actions of the user are known without the need for user's IP address, however, optionally user's IP address may be stored (col. 8, lines 53-63).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to store user's IP address and referrer log in a second database in the Matsumoto system by simply modifying the index log file (62) to be implemented as a database. One would be motivated to use a second database instead of an index log file to easier manipulate the data stored in the index log file.

Regarding claims 2 and 8, Matsumoto discloses the system further comprises a report which shows which ads generated the web clicks (col. 9, lines 61-65).

Regarding claim 3, Matsumoto discloses information about the user's buys comprises; date and time of advertising, type of advertising, location of ad and expiration date of the ad (col. 7, lines 24-40).

Regarding claim 4, Matsumoto discloses the information about a user's media buys further comprises cost of the ad (col. 5, lines 22-29).

Regarding claim 5, Matsumoto discloses the information about a user's media buys further comprises demographics of the ad (col. 6, lines 59-63).

Regarding claim 6, Matsumoto discloses a report which shows which of the web clicks do not correspond to an ad (col. 9, line 61 to col. 10, line 7).

Response to Arguments

Applicants arguments filed January 13, 2005 have been fully considered but they are not persuasive. The arguments and responses are listed below.

Applicant argues on page 5 that "Matsumoto does not teach or make obvious a second database comprising a user's IP address. Further Matsumoto does not teach or make obvious that the system compare information from the first database with information from the second database to determine which of the advertisements generated the web clicks.

Examiner disagrees. As stated in the rejection, Matsumoto teaches storing an index log file comprising a user's IP address (col. 8, lines 32-62). Even though Matsumoto does not explicitly claim the index file is a "second database", it is well known to one of ordinary skill that a database comprises a file and records for a number of functions, and it is clear that the

Application/Control Number: 10/074,401

Art Unit: 2161

index of the log file could be used for a number of functions, just as a database, hence, Examiner maintains his view that a simple modification or specific implementation of the index log file is equivalent to a database, as stated in the rejection. Applicants are reminded that arguments need to be supported by evidence. Second, naturally Matsumoto compares (analyzes) data from the first database and index log file to determine what advertisements caused users to perform specific actions (see rejection above and col. 8, lines 53-63 and col. 9).

Applicant argues on page 5 that Matsumoto does not use the IP address compared to the information about the media buy to determine what advertisement drove the user to the website.

Examiner disagrees. Matsumoto uses the IP address compared to the information about the media buy to determine what advertisement drove the user to the website, further, Matsumoto may use a referrer log or an ad placement identification code (APID) (col. 9, lines 12-22), depending on the desired method of the system implementation (fig. 2, module 60).

No other arguments have been raised, thus with respect to all the pending claims 1-8, Examiner respectfully traverses Applicants assertion based on the discussion cited above, as such, Examiner maintains the same rejections.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc R Filipczyk whose telephone number is (571) 272-4019. The examiner can normally be reached on Mon-Fri, 8:30am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Safet Metjahic can be reached on (571) 272-4023. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
